# Topic #5 Using GIS To Achieve Integrated Range Management

### **INFORMATION DOMINANCE**

Having the best "Information" is a key to sustainable range management.

Geographic Information System (GIS) spatial data is among the most effective information management tools available.

USAEC - Supporting Integrated Range Sustainment

## Topic #5 Using GIS To Achieve Integrated Range Management

#### CHALLENGES

- Integrating Stovepiped Data and Systems
- Reducing Redundant Efforts
- Developing Corporate Data
- Implementing Data Standards
- Providing Integrated Information for Planning and Decision Making

USAEC - Supporting Integrated Range Sustainment

# Topic #5 Using GIS To Achieve Integrated Range Management

**Location - Knollwood B** 

Time - 1000 - 1040

Moderator - Mr. Dave Guzewich, Technical Director, U.S. Army Environmental Center

Briefers - Mr. PJ Cisar and Mr. John Phillips, U.S. Army Environmental Center ITAM Team
